

Interactive Projector

EPSON

Our Interactive Whiteboard (IWB) Solution consists of an Ultra Short Throw *interactive Laser* projector mounted above a porcelain white board.

A wall mounted input plate allows the presenter to connect their computer/laptop and annotate over their presentation using pens and finger touch.

Speakers mounted either side of the projector provide crisp, clear audio throughout the classroom.

LASER PROJECTORS!

VARIOUS OPTIONS AVAILABLE

- Full HD Resolution now available
- Laser light source (no more lamps)
- Pen only or Finger and Pen Touch
- Non interactive models also available

Porcelain Finish White Board

The whiteboard we supply with this package is designed specifically for use with extreme short throw projectors.

The surface is a rigid, very flat finish allowing for both pen and finger touch calibration.

Standard whiteboard markers can of course still be used on this surface for dry erasable annotation.

FEATURES

- Millimeter perfect flat Projection Surface
- Aluminium trim with concealed corners and secure brackets
- Porcelain surface

Speaker System

A pair of Powered Classroom Speakers are mounted on either side of the projector for the reproduction of any audio source connected via the wall input plate.

A wall input plate is installed to the side of the whiteboard for easy connection of VGA & Audio or HDMI connection for any audio or visual device. (Laptop, PC, iPad etc...)

All internal cabling is included for connection within 5m of the projector and speakers. This can be adjusted as required.

PC connecting cables supplied include:

- HDMI, VGA & Audio, USB

These cables will allow any PC or device to be connected to the system.
